# INCIDENT RESPONSE
## Cyber Security Incident Response for Managers (CSIRM)

● ○ ○ ○  **AWARENESS-LEVEL COURSE**    Cost: **£650.00** +VAT    Duration: **1 day**

This awareness-level course is for those individuals involved in the decision making process or management of a cyber event involving an attack or data breach of a computer network. This course will introduce the concepts and stages to be considered during the planning and response phases to a cyber event.

## COURSE OVERVIEW

Assuming a basic knowledge and understanding of your organisation's incident response plan, this course is ideally suited to those responsible for decision making, management planning or responding to a cyber event involving an attack or breach of a computer network. The course will detail how effective the response plan is with regard to a real-world attack or data breach This course is theory-based with group discussions. Time permitting, a demonstration of PA's STOMP Ransomware challenge will be made available to delegates wishing to participate and understand real-world technical challenges involved in responding effectively and swiftly to a cyber event

## HOW WILL I BENEFIT?

This course will give you:
- An understanding of the importance of an effective incident response plan
- The ability to appreciate and evaluate risks to your organisation's data based on your incident response plan
- An understanding of the principles of preparing and responding to a cyber event

## COURSE PREREQUISITES:

- No CSIR technical knowledge is needed but an understanding of the requirements for information security is essential
- We recommend you refresh your knowledge and understanding of your organisation's incident response plan

## WHAT WILL I LEARN?

- You will understand the importance of cyber security frameworks
- You will gain insight as to why an effective and robust incident response plan is necessary in today's interconnected world
- You will find out how organisations become exposed to certain attacks or breaches and what can be done to mitigate this
- You will learn about employee security lapses and the importance of education programmes
- You will have the chance of stopping a Ransomware attack and understand some of the methods such malware uses to obfuscate and prevent removal

## WHO SHOULD ATTEND?

- Anyone involved in any management aspect of preparing for or managing a cyber security event

For a course with more hands-on technical content, delegates should consider PA's CSIR course.

## SYLLABUS

1. **The Threat**
2. **Cyber Frameworks**
3. **Incident response plans including:**
   - Policies
   - Procedures
   - Standards
   - Baselines
   - Guidelines
4. **Responding to an event**
5. **Education and training**
6. **STOMP challenge**
